New Product Announcement! *Centaurus Linebacker*

July 2, 2009 –

LightGuard introduces a new addition to our emergency lighting controls and AC systems lines. Available in 100 or 250 watt, the Centaurus Linebacker is designed to back up fluorescent and incandescent fixtures and is compatible with most dimming ballasts. This mini inverter is supplied with a maintenance-free, sealed lead calcium battery which will provide a minimum of 90 minutes of emergency illumination. A 120/277 dual voltage input/output provides 91% of nominal lumen output. Mounting for the Centaurus Linebacker includes surface, recessed and ceiling grid options. Self-diagnostics is optional and a remote test switch is available as an accessory.

Thank you for your continued support!

*Remember to keep **LightGuard** in mind for all of your emergency lighting needs!*
