Product Bulletin

LAD Series Going Universal Only

June 29, 2007 - Effective immediately, the LAD Series die-cast LED exit sign is being offered as a universal mount only. As we continue to monitor the market demands with this product, it makes sense to reduce the offering and accommodate any mounting application in the field out of one box. Doing so eliminates the need to produce duplicate line items on the fixture schedule should any single face products be called out. At the same time, we have chosen to reduce the housing colors being offered, again a decision based on product configuration movement. Please make note of the following product attributes:

- ◆ AC-only or self-powered models available
- ◆ All self-powered models utilize nickel cadmium batteries
- ◆ Red or green exit legends powered by high-intensity, long-life LEDs
- ◆ All AC-only or self-powered models are available in universal configurations only (two faces, back plate and canopy provided)
- ◆ Housing colors include: brushed aluminum on black, all black, and all white

We anticipate these changes will make product selection much easier to determine while still maintaining a competitive position in the market. As always, should you have any questions or concerns regarding this bulletin, please do not hesitate to contact us directly. Thank you for your continued support!
