ANNOUNCEMENT

No: LG010710-ACS
Date: 1/8/2010

LightGuard is pleased to introduce the newest addition to the Centaurus family of Uninterruptible Power Supplies for emergency lighting applications. The new **Centaurus LG2 Series** is available in four capacity ratings: 600VA, 1000VA, 1500VA and 2000VA.

The new **Centaurus LG2 Series** offering continues LightGuard's use of double conversion continuous duty UPS technology capable of supporting today's most advanced lighting systems. In addition to our standard UL 924 90 minute battery run time listing, the new **Centaurus LG2 Series** is available with a UL 924 "Auxiliary Lighting and Power" listing. This alternate listing is available for all four capacity ratings with battery run times of 10 or 20 minutes. The **Centaurus LG2 Series** also allows for up to 12 single pole output circuit breakers (without trip alarm) and up to 6 single pole output circuit breakers (with trip alarm) for load distribution. A wide array of standard features is incorporated into the new **Centaurus LG2 Series** including an automatic battery monitoring system, main input and output circuit breakers, and remote communication capabilities.

New specification sheets are available from the LightGuard web site, www.lightguard.com.
