### ***LUMINATOR SERIES WITH SMART CHARGER!***

**June 2010** - At LightGuard we pride ourselves at continuing to offer advanced technologies in emergency lighting. Within the next 30 to 60 days, our Luminator Series will be converted over to our Smart Charger circuit. The Luminator Series is ideal for locations where oil, water and dust resistant equipment are required. The Luminator Series is certified to NSF Standard 2 Splash Zone, and is UL listed for use in damp and wet locations in temperatures ranging from 0°C to 40°C. Standard Smart Charger self-diagnostics electronics continuously monitors all critical functions and the optional self-testing feature satisfies the monthly periodic testing requirements in NFPA 101 and the IBC. Installations where Luminator Series excels: manufacturing facilities, parking decks, warehouses, and water treatment facilities.

Equipped with Smart Charger for self-diagnostics, the Luminator Series is provided standard with an on-board IR receiver and is pre-programmed for use with our optional hand held test device allowing for remote testing in accordance with all applicable building code requirements. One-minute and 90-minute testing may also be initiated via the push to test switch on the unit.

The Luminator Series is available in 6 or 12 volt, 25-150 watt units with available tungsten or halogen lamp heads. The Luminator Series includes maintenance-free, sealed lead calcium or nickel cadmium batteries that surpass the requirement for 90 minutes of emergency power.

Thank you for your continued support!

*Remember to keep **LightGuard** in mind for all of your emergency lighting needs!*
