VECTRA SERIES UPGRADES TO SMART CHARGER!

October, 2010 – LightGuard is pleased to announce that our Vectra steel series emergency lighting family is now being released with Smart Charger diagnostics. This includes all models available in the series; V6, V6N, V12 and V12N models. In addition to the 6 & 12 VDC models you are familiar with, we are also including a 24 VDC V24 Series with this product launch. This new product family gives you a fixture that is versatile enough to meet your egress code requirements in commercial and industrial applications and is coupled with the most reliable and technologically sound electronics package available on the market. There are an abundance of upgrades associated with this new family, with some of the notable enhancements listed below:

- ◆ Re-designed powder painted steel enclosure with hinged cover
- ◆ Three distinct housing sizes capture 6, 12 & 24 VDC models from 25 through 450 watts
- ◆ Sealed, maintenance-free Lead Calcium and Nickel Cadmium Battery offerings
- ◆ Smart Charger diagnostics standard with optional self-testing diagnostics available
- ◆ Fully compatible with the SCIR hand-held IR testing device
- ◆ Newly designed, high performance MR16 lamp head assembly options
- ◆ Head mounting options include top, sides or bottom of enclosure
- ◆ Custom mounting plates and strapping kits available for securing to columns, poles and I-beams
- ◆ UL Damp location listing option with temperature range of 0°C to 40°C
- ◆ All factory installed options for unit equipment remain available
- ◆ Fully compliant with the Buy American provisions

The arrival of the new Smart Charger steel family will also allow us to discontinue our T12, GLC, N100/N101 and L100/L85 series. The new Vectra steel offering will bridge the high-capacity product requirement gaps traditionally filled with the various models described, and compliments our range of high capacity unit equipment requirements with advanced, sealed, maintenance-free battery offerings.

We are very excited about the added benefits and reliability improvements of our new Vectra steel series product line and look forward to assisting you with any product or application questions you may have. As always, should you have any questions, please feel free to contact us directly. Thank you for your continued support!

*Remember to keep **LightGuard** in mind for all of your emergency lighting needs!*
