## Product Bulletin

### **V6 Steel Series Emergency Lighting Offering Reduced - Effective July 3<sup>rd</sup>, 2008**

Ongoing product offering rationalization has revealed the need to discontinue our V6125 product line in all configurations. This discontinuation only affects our 6 VDC 125-watt steel product. Historical and YTD sales of the V6125 family do not warrant continued manufacturing support of these products. Please be aware that all of our other product configurations in our V6/V12 family are still available.

#### **ALL OTHER V6/V12 PRODUCTS REMAIN UNCHANGED**

If you happen to get a request for high-wattage steel product in a 6 VDC emergency operation you should make every effort to convert the order into a 12 VDC V12 product. Please find the enclosed, revised specification sheet and price sheet for the V6/V12 Series for your records. As always, should you have questions or concerns regarding this matter do not hesitate to contact us directly. Thank you for your continued support.
