# New Product Announcement!

November 2006

## *Vintage Series*

LightGuard proudly introduces the Vintage edge-lit exit with both a slim profile and numerous available finishes that will fit any architectural space. A 120/277 dual voltage input with surge protection and Smart Charger for self-diagnostics, allows the Vintage Series to serve as an emergency exit with the most reliable charging system available on the market. Illumination levels exceed 70 cd/m<sup>2</sup> with the use of high intensity, long life LEDs, taking exit illumination to new levels and upping the ante for life safety.

Installation is made easy and accommodates recessed ceiling, surface ceiling, surface end and surface wall mount configurations out of one box. Constructed of die cast aluminum, the Vintage Series is available in a wide range of decorative finishes. The Vintage Series is listed to UL 924 standards and meets or exceeds performance criteria of NFPA, IBC, NEC, BOCA and OSHA. The Vintage Series is Energy Star compliant and is suitable for use in damp locations 32°F (0°C) to 104°F (40°C).

LightGuard is a leading manufacturer of commercial and industrial emergency lighting, exit signs and AC emergency lighting systems. LightGuard is a Genlyte company and distributes its products worldwide and is on the web at [www.lightguard.com](http://www.lightguard.com).
