New Product Announcement!

INDOOR/OUTDOOR ARCHITECTURAL LOW-LEVEL WHITE LED SOLID STATE LIGHTING

February 16, 2009 –

LightGuard proudly introduces the newest addition to our solid state lighting family, Grafix. Grafix will complement any architectural space, indoors and out, where low-level security lighting is desired. Security and emergency illumination is provided by the latest in high-output, long-lasting, energy-efficient, white LED technology with a custom reflector to allow for optimum light output. The housing is constructed of durable die-cast aluminum with a polycarbonate lens. Grafix is UL damp location and wet location listed, and is available with an optional concrete-pour back box and powder coated stamped aluminum trimplate.

Optional emergency platforms are available. A 120/277 dual voltage input with surge protection and Smart Charger for self-diagnostics allows Grafix to serve as a security as well as an emergency lighting unit with the most reliable charging system available on the market. Standard Smart Charger self-diagnostics electronics continuously monitors all critical functions of Grafix and the optional self-testing feature satisfies the monthly periodic testing requirements in NFPA 101 and the IBC. Self-powered models include a maintenance-free, sealed nickel metal hydride battery that allows for 90 minutes of emergency power.

Thank you for your continued support!

*Remember to keep **LightGuard** in mind for all of your emergency lighting needs!*
