New Product Announcement!

NEW ARCHITECTURAL WHITE LED SOLID STATE LIGHTING

November 25, 2008 –

Putting LED innovation to work, the Illusion III is the latest expansion to LightGuard's solid state lighting family. With the slim ceiling recessed profile and numerous available finishes, Illusion III will enhance any architectural space with no design compromises. High-output, long-lasting, energy-efficient, white LEDs with a custom reflector, allows for optimum and even light output. The housing is constructed of durable die-cast aluminum with a polycarbonate lens. All Illusion III models carry a UL damp location listing standard and meet or exceed the requirements for egress lighting as defined in the International Building Code (IBC), Life Safety Code (NFPA 101) and the National Electrical Code (NEC).

Optional emergency platforms are also available. A 120/277 dual voltage input with surge protection and Smart Charger for self-diagnostics allows Illusion III to serve as an emergency lighting unit with the most reliable charging system available on the market. Standard Smart Charger self-diagnostics continuously monitors all critical functions of Illusion III and the optional self-testing feature satisfies the monthly periodic testing requirements in NFPA 101 and the IBC. A maintenance-free, sealed nickel metal hydride battery allows for 90 minutes of emergency power.

Thank you for your continued support!

*Remember to keep **LightGuard** in mind for all of your emergency lighting needs!*
