## Product Bulletin

### *LEF Ordering Change*

**March 19, 2008** - We are pleased to inform you that we have now made the LEF (high-performance MR16 outdoor remote heads) easier to order. Rather than order separate line items for the head assembly, mounting plate, and lamps, we have configured these components for assembly at the time of ordering. This change goes into effect immediately.

The new assembly numbers will continue to be offered in both black and bronze head assemblies and mounting plates. However, we will now offer these heads with either a 4" round or rectangular single-gang mounting plate for more of a universal solution at the job site. Also, we will continue to offer these head assemblies with our high-performance MR16 lamps (supported with .ies files on our web site), but you may choose to order these heads without lamps and install them in the field.

As always, should you have any questions or concerns regarding this bulletin please do not hesitate to contact us directly. Thank you for your continued support.
