Unity Series DC Input Option

November 20, 2008 - LightGuard is pleased to announce that the extremely functional Unity white LED luminaire series is now being released with yet another optional emergency mode of operation; a universal 12 through 48 VDC remote emergency input. This product option compliments and completes the various emergency lighting configurations available in the Unity Series. The following highlights are just a few of the exceptional features available:

- ◆ All models include normally-on operation that may be controlled via wall switching, remote photocell or time clock control
- ◆ Self-powered models feature Smart Charger diagnostics standard
- ◆ Optional self-testing diagnostics
- ◆ Optional Smart Charger IR remote test device
- ◆ UL wet location listing standard
- ◆ Indoor/outdoor wall mount
- ◆ All of our standard in-house paint schemes with custom colors optional

The product specification and product information requests for Unity have been absolutely phenomenal. If you have not jumped on board with what we believe to be the most talked about lighting fixture ever from LightGuard, you should do so now.

Thank you for your continued support!
